

## **Emotion Detection for Animal Welfare**

Professor Suresh Neethirajan has created a facial recognition to detect the emotions and behaviors of

## **Online Thrift Store for Pets**

The Dakin Humane Society has recently come out with an online thrift store for both pets and owners. 100% of the proceeds will fund Dakin's essential

pigs and cows. This technology will pick up levels of discomfort to help with agriculture. Read more about how this new technology will advance the way we understand animals below.

## Shrinking Pet Returns

A shelter in Texas has shifted its adoption process that is better for both potential owners and animals. They have started a process that limits pet surrenders by implementing adoption appointments for prospective owners. Adoption appointments allow for a discussion to take place to see if their lifestyle, work schedules, and interests will be a good fit for a pet. Read more about how this new process has been successful for WCRAS.
